PROFESSIONAL SUMMARY

Staff/Principal-level Software Engineer with 9+ years building and scaling cloud-native products and architectures for startups and enterprise environments. Combines strong analytical thinking, deep problem-solving skills, and ownership to drive product excellence from idea to production. Experienced in remote collaboration, rapid iteration cycles, cross-discipline delivery, and leading teams to ship impactful features.

Core Strengths: Product-centric engineering, API & backend systems, cloud infrastructure, team mentorship, and solving ambiguous problems quickly.

CORE SKILLS

Engineering & Architecture: Java (7 → 25), Kotlin, TypeScript, Spring Boot, Node.js, REST APIs, Microservices

Cloud & DevOps: AWS (ECS Fargate, S3, ALB), Docker, CI/CD (GitHub Actions, Jenkins)

Data & Performance: Redis, MongoDB, PostgreSQL, Scalability & Optimization

Product & Delivery: Feature Ownership, Technical Leadership, Agile/Lean, Cross-functional Collaboration

Startups & Remote: High-velocity delivery, async communication, multi-role adaptability

EXPERIENCE

Principal Technical Architect (Stealth AI Startup)

Mar 2025 – Present (Remote)

- Defined and led backend platform architecture for an AI-driven product roadmap.
- Collaborated directly with founders (CEO/CTO) to design and roll out core features through rapid releases.
- Built cloud infrastructure patterns supporting large data processing, observability, and automated deployments.

Startup Impact:

- Set up MVP infrastructure and API patterns that enabled scaling without rework.

- Enabled continuous delivery pipelines, reducing deployment lead times and hazards.
-

Staff Software Developer — BitGo

Aug 2024 – Dec 2024 (Hybrid)

- Enhanced multi-chain wallet recovery services with reliable, scalable backend APIs.
- Integrated blockchain service modules with AWS-hosted services that supported real-time operations.

Startup-Like Wins:

- Built core platform features under tight deadlines with high quality and ownership.
-

Software Development Engineer III — Get My Parking

Mar 2020 – Apr 2023 (Remote)

- Built and optimized microservices, improving service performance by **20%**.
- Introduced practices that reduced bugs by **25%** and sustained **zero P1 issues for 3 months**.
- Led a multi-discipline engineering team (QA + Dev + Interns) and delivered key product launches.

Startup Impact:

Owned backend systems from design through production, shaping the product experience.

Senior Software Developer | Team Head — UrbanPro.com

Jun 2019 – Feb 2020

- Optimized backend and frontend performance, contributing to better user engagement.
-

Senior Systems Engineer — Infosys

Apr 2018 – Mar 2019

- Built enterprise APIs with strong reliability and maintainability.
-

Application Development Analyst — Accenture

Mar 2016 – Mar 2018

- Delivered core risk-calculation services as part of a banking platform team.

SELECTED ACHIEVEMENTS

- **Reduced development time by 56%** with code cleanup and refactoring.
 - Improved system performance by **20%** through optimization and review practices.
 - **Led teams of 9 engineers**, including full delivery cycle and mentoring.
 - **Zero P1 production incidents for 3 months**, raising platform trust.
 - Delivered major product features directly with CTO/CEO ownership alignment.
-

EDUCATION

B.Tech in Information Technology - MPUAT, Udaipur (2011-2015) - 7.14 CGPA

TECHNICAL PROFICIENCIES

Java • Kotlin • Spring Boot • Node.js • REST APIs • Microservices • AWS (ECS, S3, ALB) • Docker • CI/CD Tools • Redis • MongoDB • PostgreSQL • Performance Optimization • Remote Delivery

REMOTE WORK COMPETENCIES

- Effectively collaborated with distributed teams across time zones
 - Documented and communicated architectural decisions for clarity
 - Prioritized asynchronous communication and engineering autonomy
 - Implemented telemetry and monitoring for global operational visibility
-
